Art Unit: 1623

1. Claims 1-5 are pending in this application.

2. OBJECTION TO SPECIFICATION:

(A) The specification is objected to because the claims have not been presented on a separate page.

(B) The abstract of the disclosure is objected to because the "Abstract of the Disclosure" has not been presented on a separate page. Correction is required. See MPEP § 608.01(b).

3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-5 are indefinite because the claims are written in the past-tense. It is suggested the claims be rewritten in the present tense to comply with US patent practice and to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1623

Claim 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: "means of a mass balance". It is suggested that claim limitations describing "means of a mass balance" be added to independent claim 1 to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Skrgatic et al (US 4,959,228) disclose a method of determining the specific gravity of a fermentable liquor during fermentation and has been cited to further show the state of this art.

The Berdelle-Hilge (US 3,769,175), Bartkiewicz (US 5,900,547), Brown, C. J. L. (US 4,557,186), and Mead et al (US 6,150,133) references have been cited to further show the state of this art.
